WORK EXPERIENCE

iOS Developer - Dev-id

Toulouse, France

Jun 2025 - Present

- Develop the official Alpine Telemetrics iOS app: real-time driving data display (lateral G-force, lap times, brake temperature) with telemetry overlay on recorded video sessions
- Build the Stade Toulousain official app using KMM shared architecture (SwiftUI + Jetpack Compose): live match mode with score notifications, interactive stadium map, player stats, calendar sync
- Develop Vox Chat for Oreus AI: in-app purchases (Orbs) and specialized AI mini-agents (Voxies), following MVVM architecture and Figma mockups
- Contribute to web (React, TypeScript) and Android (Jetpack Compose) development alongside iOS projects

Web & Mobile Developer - Dev-id

Toulouse, France

Sep 2023 - May 2024

- Developed and maintained Reepair, a SaaS platform for independent repair professionals: online booking with deposits, automated SMS reminders, quotes and invoicing — used by 3,700+ repairers across France
- Developed The Optimum Prod, a business management app (real-time dashboards, project budget monitoring, compliance reporting) — deployed in 3 countries with 100+ partner companies

Fullstack Developer - Ubigreen

Labège, France

Jul 2022 - Nov 2022

- Improved the front-end (Angular) and back-end (C#, SQL) solution
- Implemented an end-to-end testing strategy using Cypress

EDUCATION

Master's in Software Engineering - Epitech

Toulouse, France

2021 - 2026

Computer Engineering & Computer Science - CSULB

Long Beach, CA

2024 - 2025

PROJECTS

Savy - AI-Powered Language Learning App

SwiftUI · SvelteKit · Figma

Published on the App Store. Users practice speaking and writing with AI-driven characters, each with a unique personality and accent. Real-time correction of pronunciation, grammar, and vocabulary. Epitech Innovative Project — designed the UI and developed the iOS app.

Delcard - Peer-to-Peer Card Game Platform

SvelteKit · TailwindCSS · WebRTC

Real-time multiplayer web platform with no server and no sign-up. Supports 7 games connected peer-to-peer via WebRTC.

Hermès VIP - Luxury Concierge App Concept

SwiftUI · Clean Architecture · @Observable

SwiftUI concept app reimagining the luxury concierge experience for Hermès Paris. Faithful to the house's spirit, it delivers an exclusive, refined experience for users.

TECHNICAL SKILLS

iOS / Apple	SwiftUI, MVVM, Xcode, App Store Connect
Cross-platform	Flutter, Kotlin Multiplatform (KMM), Jetpack Compose
Web	React, TypeScript, Angular, SvelteKit, Tailwind CSS
Back-end	C#, Python, SQL, REST APIs
Tools	Git, Figma, Cypress

LANGUAGES

English - Fluent (C1), exchange year at CSULB

Français - Native
